

News for the health and care system

06 Dec 2017

We've got a packed newsletter this month (I'll leave you to insert your own festive metaphor!).

We've refreshed our [staff engagement pages](#) with extra information, resources and case studies. We can now make freely available the [Operation TLC behaviour change resources](#) – first developed for Barts NHS Trust with Global Action Plan (GAP). Thanks to GAP for making these available for organisations who want to pick up a behaviour change campaign and run with it.

We've also got news on a new sustainability reporting online portal, the Sustainable Development Assessment Tool – SDAT - and a request for your healthy travel plans, policies and other materials. Plus a great case study on sustainable dementia services.

Thanks for reading and please keep in touch

The SDU team

Latest News

[Improvements to new Sustainable Development Assessment Tool - SDAT](#)

Improvements to the new self-assessment tool include better exports for action plans, improved dashboard and fixes to issues around submitting modules before completion.

Case Study

Young people with dementia service and sustainability

The Berkshire charity Younger People With Dementia (YPWD) and Berkshire Healthcare NHS Foundation Trust have developed a new and innovative model of care to provide a more tailored service to meet the specific needs of individuals and their carers living with early onset dementia.
